

Chapter 10: Guidelines for New Construction

- Reorganized so that Level 1 variables and Level 2 variables are grouped together and subsections created as appropriate.
- Updated “Reviewing New Construction” to an updated section on “Process.”
- Eliminated language about steeples and dormers.
- “Roof shape” moved to be under section on “Form.”
- Eliminated all sections describing buildings of specific use (commercial retail buildings, multi-family dwellings, etc.) because the Commission’s review should be based on the surrounding context, regardless of use.
