

2030 STRATEGIC PLAN

The City of Frederick needs your voice!

Help us craft a strategy for driving future improvement in your hometown. The City of Frederick is writing its first strategic plan. A strategic plan will identify and rank important issues and priorities within our city. It is then used to help guide the city budget and future city plans. We need to know what is most important to you and what could be even better! Join us at any one of the community engagement events and tell us what matters most to you. The evening will include large and small group discussions, community information gathering activities, and light refreshments. Everyone in The City of Frederick is encouraged to attend. Watch the City website for strategic plan progress updates!
